Work Experience

Research Assistant, Part-time worker

Research Center For Quantum Engineering Design

2021–2022

- Research and analyze customer needs and trends in order to develop product strategies.
- Design, create and test new products to meet customer demands.
- Collaborate with other departments to develop test plans and quality assurance processes.
- Monitor product performance and interact with customers to gather feedback and suggestions for improvement.

Education

S.1 Fisika | Universitas Airlangga | 2016–2021

- Comprehensive knowledge of theoretical and applied physics, and quantum mechanics.
- Experienced in research and development of projects in both lab and field settings.
- Proficient in utilizing a number of computer software and hardware for data processing and modeling.
- Experienced in data analysis and creating reports or presentations based on research results.

Skills

- Information technology
- Data analysis
- Report writing
- Project management
- Quantum mechanics
- Analytical skills

Summary

S1 Fisika graduate with a passion for information technology and data analysis. Experienced in conducting research and development in both lab and field settings. Proficient in a variety of computer software and hardware for data processing and modeling. Possess excellent analytical, problem-solving and project management skills. Excellent report writing ability and able to provide innovative solutions to customer demands.
